Experience

2020 - Till Date
Webdigits communication Ltd
Computer Neworking

At Webdigit commutation Ltd, I successfully implemented several large-scale networking projects, including the integration of new software systems and the migration of data to cloud-based platforms. I also worked closely with other IT professionals to ensure that networks were running efficiently and effectively. Overall, I am committed to providing reliable and efficient computer networking services to meet my clients' needs."

2019 - 2020
Multifix Computer Technology
CCTV Installation

At Mulifix computer technology, I was responsible for installing and configuring CCTV systems for clients, ensuring that systems were running efficiently and effectively. I encountered several challenges during my projects, such as working with difficult wiring and ensuring the system was compatible with the client's existing security infrastructure. However, I was able to overcome these challenges through careful planning and troubleshooting. The end result was a highly effective CCTV system that provided clients with the security and peace of mind they needed. Overall, I am committed to providing top-quality CCTV installation services to meet my clients' needs."

2018 - Till Date
Frontend Developer

Self-Taught Frontend Developer: In my spare time, I have been learning Frontend development through online courses and tutorials. I have gained proficiency in HTML, CSS, and JavaScript, and demonstrate my skills in these areas. I am committed to continuing to improve my Frontend development skills and am excited to apply them in a professional setting.

2014 - 2019
Murphius Links Technologies
System Engineer

At Murphius Links Technologies, I successfully implemented several large-scale IT projects, including the integration of new software systems and the migration of data to cloud-based platforms. I also played a key role in ensuring the organization's systems were secure and compliant with industry standards and regulations. Overall, I am committed to providing reliable and efficient IT services to meet my clients' needs."
